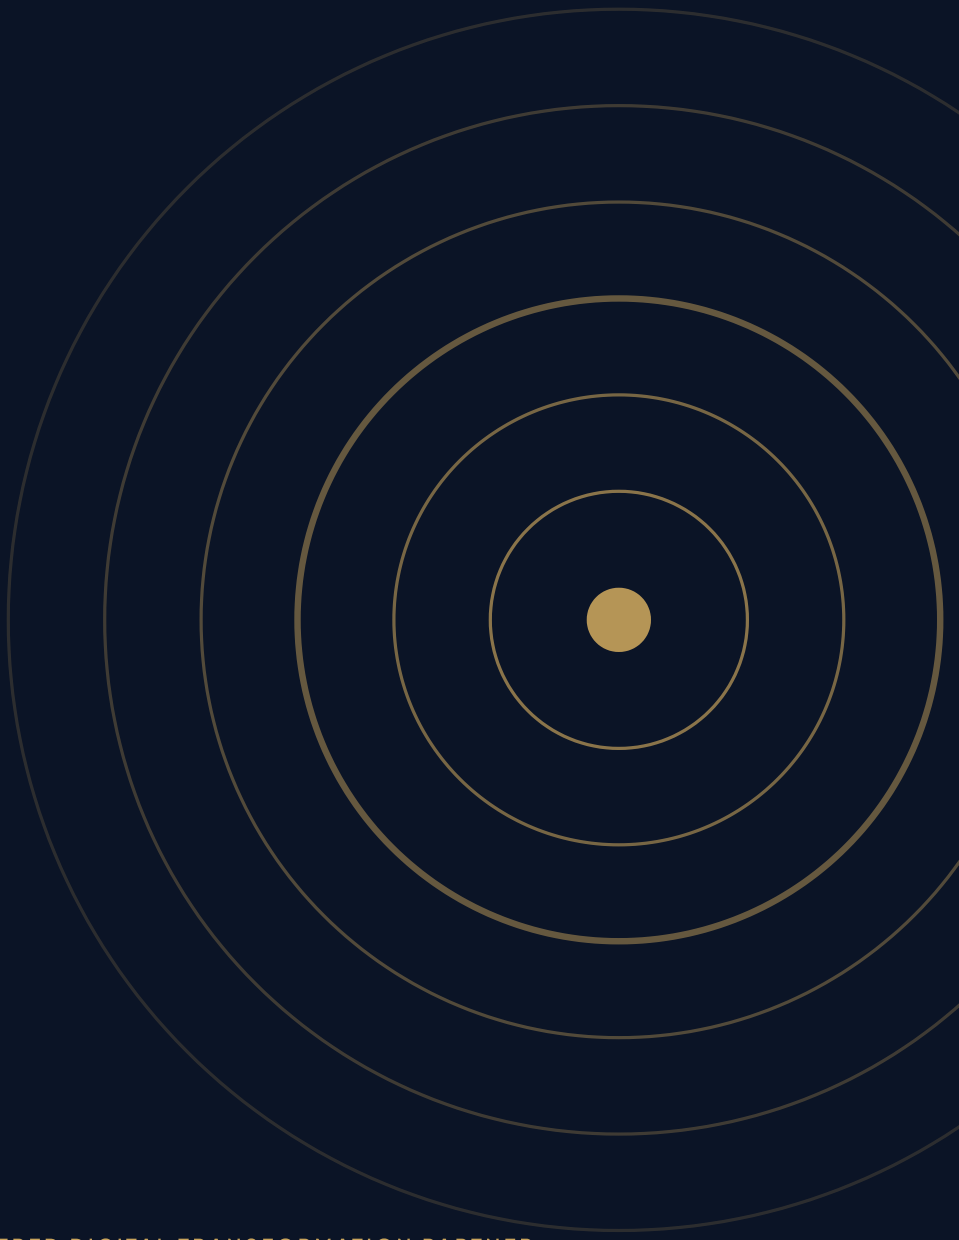
ENRIVOLV IT SOLUTIONS

enrivolv.in



ENRIVOLV® · TRADEMARK-REGISTERED DIGITAL TRANSFORMATION PARTNER

Digital transformation, engineered to endure.

A trademark-registered digital transformation company delivering custom software, mobile apps, migration, integrations, test automation, cloud, ERP and AI from Bengaluru to clients across five countries.

Custom Software Development · Mobile & Desktop Apps · Migration & Modernisation · Integrations & APIs · Test Automation & QA · Cloud & DevOps · Enterprise ERP Solutions · AI Solutions

ABOUT US

Innovation. Integrity. Impact.

Enrivolv IT Solutions Pvt. Ltd.® is a trademark-registered, employee-first technology company headquartered in Bengaluru. We help startups, enterprises and public-sector organisations transform with technology: building new software, modernising what they have and connecting it all together.

3+	21+	15+	5
Years of delivery	Projects delivered	Clients served	Countries

A trademark-registered brand you can trust

Trademark-registered brand
Enrivolv® is a registered trademark: a name that stands behind every project we deliver.

Award-winning
Fastest Growing Indian Company Excellence Award, International Achievers Conference 2025.

Trusted worldwide
Clients including the United Nations, LexisNexis and NTT Data, across five countries.

Your IP, protected
NDA on request, and full ownership of your code, designs and data.

Fastest Growing Indian Company Excellence Award · International Achievers Conference, India Habitat Centre, New Delhi, 31 May 2025

OUR MISSION

"To be a trusted partner in shaping innovative digital ecosystems that empower businesses globally."

OUR VISION

"A world where every business, whatever its size, can run on software as dependable as the people behind it."

Our values

Innovation with Integrity
We push boundaries while holding the highest standards of ethics and transparency in everything we deliver.

Client-Centric Collaboration
Your success is our measure. We embed with your teams and build long-term partnerships, not one-off projects.

Commitment to Excellence
From code quality to client communication, excellence is our baseline, not an aspiration.

Agile & Transparent Culture
Flat hierarchy, rapid iteration and honest dialogue let us move fast without breaking trust.

Trusted by organisations worldwide

CORE SERVICES

Everything digital, under one roof

01

Custom Software Development

Bespoke platforms engineered around the way your business actually works.

- Web applications and customer portals
- SaaS and multi-tenant platforms
- API design, integrations and microservices
- Legacy modernisation and re-platforming
- Quality assurance and test automation
- Long-term maintenance and support

What you get: A system that fits · You own everything · Built to change · Visible progress

.NET · Node.js · Python · React · Angular · Next.js

02

Mobile & Desktop Apps

Android, iOS and Windows apps — from a focused MVP to enterprise scale.

- Native Android apps (Kotlin, Jetpack Compose)
- Native iOS and iPadOS apps (Swift, SwiftUI)
- Windows desktop apps (.NET MAUI, WinUI 3, WPF, Electron)
- Cross-platform apps from one codebase (Flutter, React Native)
- Offline-first sync, push notifications, payments and SSO
- Google Play, App Store, Microsoft Store and private enterprise distribution

What you get: Right platform choice · Works offline · Store-ready · Room to grow

Kotlin · Swift · Flutter · React Native · .NET MAUI · WinUI 3

03

Migration & Modernisation

Move legacy systems, data and servers to modern platforms, without stopping the business.

- Legacy code upgrades (VB6, WinForms, .NET Framework → modern .NET)
- Front-end modernisation (AngularJS → latest Angular or React)
- Desktop-only software → web and mobile apps
- On-premise → Azure, AWS or Google Cloud
- Database and data migration with reconciliation
- Spreadsheets and Access → proper business systems

What you get: No business downtime · Lower running costs · Data you can trust · Ready for what's next

.NET 8 · Angular · React · Azure · AWS · Google Cloud

04

Integrations & APIs

Connect your apps, ERP, CRM, payment gateways and government APIs into one smooth flow.

- REST and GraphQL API design and development
- ERP, CRM and HRMS integrations (SAP, Salesforce, Zoho, Tally and more)
- Payment gateways: Razorpay, Cashfree, PayU, PhonePe, Stripe
- Government and compliance APIs (GST, e-invoicing, SMS/DLT)
- Webhooks, event-driven and message-queue integrations
- Integration monitoring, retries and reconciliation

What you get: No more re-typing · Fewer errors · Real-time visibility · Easy to extend

REST · GraphQL · Node.js · .NET · Azure Service Bus · RabbitMQ

05

Test Automation & QA

Automated and manual testing that lets you release faster with fewer bugs.

- Web UI automation (Playwright, Cypress, Selenium)
- Mobile app test automation (Appium)
- API and contract testing
- Performance and load testing
- BDD test design with Cucumber
- Manual, regression and user-acceptance testing

What you get: Faster releases · Fewer production bugs · Clear quality reports · Tests that last

Playwright | Cypress | Selenium | Appium | Cucumber | Postman

06

Cloud & DevOps

Secure cloud architecture and automated pipelines for faster, safer releases.

- Cloud architecture on Azure, AWS and Google Cloud
- CI/CD pipelines and release automation
- Docker and Kubernetes
- Infrastructure as code (Terraform, Bicep)
- Monitoring, alerting and logging
- Backup, disaster recovery and cloud cost optimisation

What you get: Faster, safer releases · Lower cloud bills · Higher uptime · Security built in

Azure | AWS | Google Cloud | Docker | Kubernetes | Terraform

07

Enterprise ERP Solutions

One connected system for people, payroll, finance and operations.

- HR, attendance, leave and payroll
- PF, ESI, PT and TDS statutory compliance
- Accounts, invoicing and GST
- Inventory, procurement and multi-branch operations
- Role-based access, approvals and audit trails
- Dashboards and management reporting

What you get: One source of truth · Compliance built in · Control and visibility · Scales with you

.NET | Angular | React | SQL Server | PostgreSQL | Azure

08

AI Solutions

Practical, responsible AI built into the products and processes you already run.

- AI strategy, use-case discovery and proof of concept
- Generative AI assistants and document intelligence
- Machine learning and predictive analytics
- Natural language processing and chatbots
- Intelligent process automation
- Data engineering and MLOps

What you get: Clear business case · Fast proof of value · Your data stays yours · Responsible by design

Python | PyTorch | scikit-learn | LangChain | Azure OpenAI | AWS SageMaker

Ways to work together

Fixed scope
A defined outcome, timeline and price — ideal for well-understood projects and MVPs.

Dedicated team
Engineers, designers and testers working as an extension of your own team.

Time & materials
Flexible capacity for evolving products where priorities change sprint to sprint.

MODERNISE & CONNECT

Modernise what you already have

AI-assisted analysis maps old code quickly, so modernisation costs less and takes less time than a rewrite from scratch.

WHERE YOU ARE		WHERE WE TAKE YOU
~~VB6, WinForms, .NET Framework~~	→	**Modern .NET 8 / .NET 10**
~~AngularJS or older Angular versions~~	→	**Latest Angular or React**
~~Desktop-only software~~	→	**Web and mobile apps**
~~On-premise servers~~	→	**Azure, AWS or Google Cloud**
~~Spreadsheets, Access, legacy databases~~	→	**SQL Server, PostgreSQL or MongoDB**
~~Manual processes~~	→	**Automated, AI-assisted workflows**

Payments, done end to end

Razorpay · Cashfree · PayU · Easebuzz · PhonePe · Stripe

- UPI, cards, net banking and wallets
- Subscriptions and recurring billing
- Webhooks, refunds and reconciliation
- GST-ready invoices

Integrations we build

- **API development:** Secure, well-documented REST and GraphQL APIs for your products, partners and mobile apps.
- **ERP & CRM integration:** Connect SAP, Salesforce, Zoho, Tally, HRMS and accounting systems with your own software.
- **Payment integration:** UPI, cards, net banking, wallets and subscriptions through Indian and international gateways.
- **Government & compliance APIs:** GST, e-invoicing, e-way bills, SMS/DLT and other regulatory integrations.
- **Event-driven integration:** Webhooks, message queues and real-time sync between systems.

AI-augmented delivery

STAGE	WHAT AI DOES	WHAT OUR ENGINEERS DO
Requirements	Drafts specs, user stories and screen flows from your notes	Validate scope with you and lock it down
Development	Generates code, boilerplate and integrations in any language	Design the architecture and review all code
Testing	Writes unit, API and end-to-end test cases	Define what “done” means and verify results
Migration	Reads legacy code and drafts the modern version	Plan the cut-over and protect your data
Documentation	Produces guides, API docs and handover notes	Check accuracy and keep them current

WE ALSO OFFER

Capabilities that make great software run well

Cybersecurity
Protection, testing and compliance for applications, networks and cloud.

- Penetration testing
- Security audits
- ISO 27001 & GDPR readiness

Data & Analytics
Warehousing, dashboards and insight that turn raw data into decisions.

- Data warehousing & ETL
- Power BI & Tableau
- Customer analytics

UI/UX & Web Design
Design, websites and commerce that make your brand a pleasure to use.

- UI/UX design & prototyping
- Websites & portals
- eCommerce platforms

Process Automation
Remove repetitive manual work with workflows, bots and AI-assisted automation.

- Workflow & approval automation
- RPA bots
- Document processing

Maintenance & Support
Keep existing software secure, fast and up to date, whoever built it.

- Bug fixes & upgrades
- Monitoring & SLAs
- Takeover of existing apps

Dedicated Teams
Experienced engineers, testers and designers working as part of your own team.

- Staff augmentation
- Offshore development team
- Flexible scaling

ANY STACK

Technologies we work with

If your project needs Java, Go, PHP, Salesforce, SAP or something older, we can build it, support it or move it.

AI & ML	OpenAI, Claude, Gemini, LangChain, vector databases, Python ML
Frontend	React, Angular, Next.js, TypeScript, Tailwind CSS
Backend	.NET Core, C#, Python, Node.js, Java
Mobile & desktop	Kotlin, Swift, Flutter, React Native, .NET MAUI, WPF, WinForms
Data	SQL Server, PostgreSQL, MySQL, MongoDB, Firebase, Snowflake, Power BI
Cloud & DevOps	Azure, AWS, Google Cloud, Docker, Kubernetes, Terraform, Grafana
Testing	Playwright, Cypress, Selenium, Appium, Cucumber BDD, API and load testing
Integrations	REST, GraphQL, webhooks, Razorpay, Stripe, SAP, Salesforce, Tally

HOW WE WORK

A calm, transparent process

Five stages, the same on every engagement. You see progress at every step and approve each stage before we move on.

1 **Discover**
Workshops to understand your goals, users and constraints, and to agree what success looks like.

2 **Design**
Architecture, user journeys and interface design, validated with you before a line of code.

3 **Build**
Agile sprints with working software every two weeks and full visibility of progress.

4 **Deliver**
Rigorous testing, a smooth launch and store or production release handled end to end.

5 **Support**
Monitoring, maintenance and continuous improvement long after go-live.

Our promise to every client

- **Confidential from the first call.** We are happy to sign a non-disclosure agreement before you share any details of your idea or business.
- **The team you meet builds it.** Experienced engineers work on your project from start to finish.
- **One accountable contact.** A dedicated project lead who knows your project inside out and answers your questions quickly.
- **Honest, independent advice.** We recommend the technology that fits your goals and budget, even when that means building less.
- **You own what you pay for.** Source code, designs, documentation and intellectual property belong to you, with no lock-in and no hidden licence fees.
- **Total transparency.** Working software demonstrated every sprint, shared task boards and plain-English progress reports.
- **Secure by default.** Secure coding, access controls, encrypted data and regular dependency updates are part of every build.
- **Here after launch.** Maintenance, monitoring and improvements long after go-live, so your investment keeps paying off.

Industries we serve

Financial Services
Secure, compliant platforms for lenders, advisers, insurers and fintech start-ups.

Healthcare
Digital tools that help clinics, labs and providers spend more time on care.

Retail & eCommerce
Commerce experiences that convert, and the back office to run them smoothly.

Manufacturing
Connected operations from purchase order to production floor to dispatch.

Telecom & ISPs
Automation for broadband operators, from subscriber sign-up to billing and support.

Automotive
Software for workshops, dealers and service centres that keeps vehicles moving.

Education
Platforms that make learning, administration and communication simpler.

Government & Public Sector
Secure, accessible and highly available information systems for public organisations.

Logistics
Real-time visibility for fleets, warehouses and deliveries.

Professional Services
HR, payroll and client management for consultancies, agencies and firms.

OUR OWN PRODUCTS

Software built to run your business

ISP MANAGEMENT PLATFORM

ISPRO

Run your entire broadband business from one operator-friendly console.

- Subscriber and connection management
- Plans, bandwidth packages and renewals
- Automated billing with GST invoices

HR, PAYROLL & ACCOUNTS

eScope HRMS & Payroll

Payroll that calculates itself — HR and accounts, centralised.

- Attendance, shifts and leave management
- Automatic payroll calculation
- PF, ESI, PT and TDS compliance

AUTOMOTIVE WORKSHOPS

Garage Management System

Cloud software that keeps busy workshops moving.

- Digital job cards and estimates
- GST invoicing
- Spare-parts inventory

APPOINTMENTS & RESERVATIONS

Booking Platform

Online bookings, payments and reminders — on web and mobile.

- Real-time availability and online booking
- Online payments and deposits
- SMS, email and WhatsApp reminders

Why businesses choose Enrivolv

Senior, accountable teams

Experienced engineers who own outcomes, not just tickets.

Technology-agnostic advice

We recommend what fits your needs, with no vendor lock-in.

Built to last

Clean architecture, documentation and tests, so your software keeps working for you.

> *"Partnering with their team was a game-changer. Their strategic IT services enabled us to modernize legacy systems, improve service uptime, and cut operational expenses — all while aligning with our long-term digital roadmap."*
>
> Robin Varghese, Director – IT Services, BSC Solutions, Inc.

> *"Their ability to translate our product vision into scalable solutions was exceptional. From feature prioritization to agile delivery, the team consistently hit milestones and helped us reduce our time-to-market significantly."*
>
> Thebenare Wesley, Product Manager, LexisNexis
